

GETTING OUT:

The RMOW's eight-step evacuation guide is a must-have for every resident, but any actual evacuation is going to be a fluid process. A safe and orderly evacuation will rely on an informed public that is listening to the instructions of local officials.

WHERE TO GO:

EVACUATION BY PUBLIC TRANSIT

If you do not have personal transportation, go to the nearest transit stop. A bus will pick you up and transport you to the Reception Centre.

RECEPTION CENTRE

A Reception Centre is a place where you can:
- **go** after an emergency to get help with food, lodging, clothing and medicine and;
- **register** to let authorities know that you have safely evacuated.

Location will vary depending on the emergency.

HEALTH OR MOBILITY ISSUES

If you have (or someone in your house has) a health or mobility issue and need help evacuating, let emergency officials know when they knock on your door, or phone 604-932-5535

HOW TO SHELTER IN PLACE:

In some cases, shelter-in-place is recommended, instead of evacuation. Shelter-in-place means staying indoors to stay safe, if there is a hazardous material in the air.

1. Go inside and check whistler.ca or turn on radio.
2. Close all windows and doors.
3. Turn off exhaust fans.
4. If there is a strong odour, seal an inside room with wet towels at the base of the door.
5. Check for updates.
