Methodology

The analysis in this report is based on results of a survey conducted from September 26-27th, 2023 among a sample of 1010 adults, 18 years of age or older, living in Ontario and are eligible to vote in provincial elections. The survey was conducted using automated telephone interviews using Interactive Voice Recording technology (IVR). Respondents were interviewed on landlines and cellular phones. The sample was weighted by age, gender, and region according to the 2021 Census. The survey is intended to represent the adult population in Ontario.

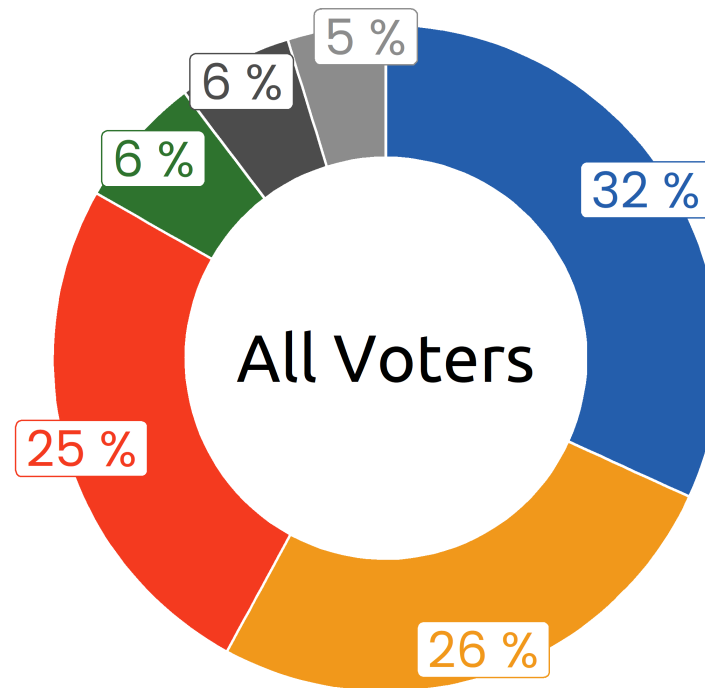

This survey was sponsored by The Trillium.

The margin of error for the poll is $\pm 3.1\%$ at the 95% confidence level. Margins of error are higher in each subsample.

Totals may not add up 100% due to rounding.
